Why do we code clinical data.....

- Validate/clean the source data
- Understand our safety profile
- Identify/understand interactions
- Report our data
- Secure approval
- Detect potential Signals and manage risk

Coding requirements

- Timely
 - Consistent
 - Controlled
 - Automated
 - Manageable
 - Not a burden on our business
- How has technology helped ?

Arthur C. Clarke (1917–2008)
"Profiles of The Future", 1961
(Clarke's third law)

“Any sufficiently advanced technology is
indistinguishable from magic.”

1996 – Progress (of sorts)

- Ability to use electronic thesauri such as WHO-DD & ICD-9
- Application focused, not role focused
 - Clinical Data Management Systems
 - Drug Safety Systems
- Data coded by different departments using different technologies
 - Reconciliation requirement
- How to provide for a Central Coding department ?

1998

1998 – Getting sophisticated

- Tools for Central Coding
 - Allowing coding across Clinical Trials
 - Providing data query facilities
 - Support for new hierarchical dictionaries such as MedDRA
 - Tuneable autoencoding algorithms
 - Word Stemming
 - Punctuation removal

must be lived forwards.”**

The Future

- Timely ✓ Yes
- Consistent ✗ Not necessarily
- Controlled ✓ Yes
- Automated ✓ Yes
- Manageable ✗ Partially
- Not a burden on our business ✗ Work to do

The Future

- Single technology providing all users with consistent, real-time coding capabilities across **ALL** data sources.
