What is the Accenture Life Sciences Cloud?

The Accenture Life Sciences Cloud is a platform design to provide actionable insights from your clinical, operational, safety and regulatory data.

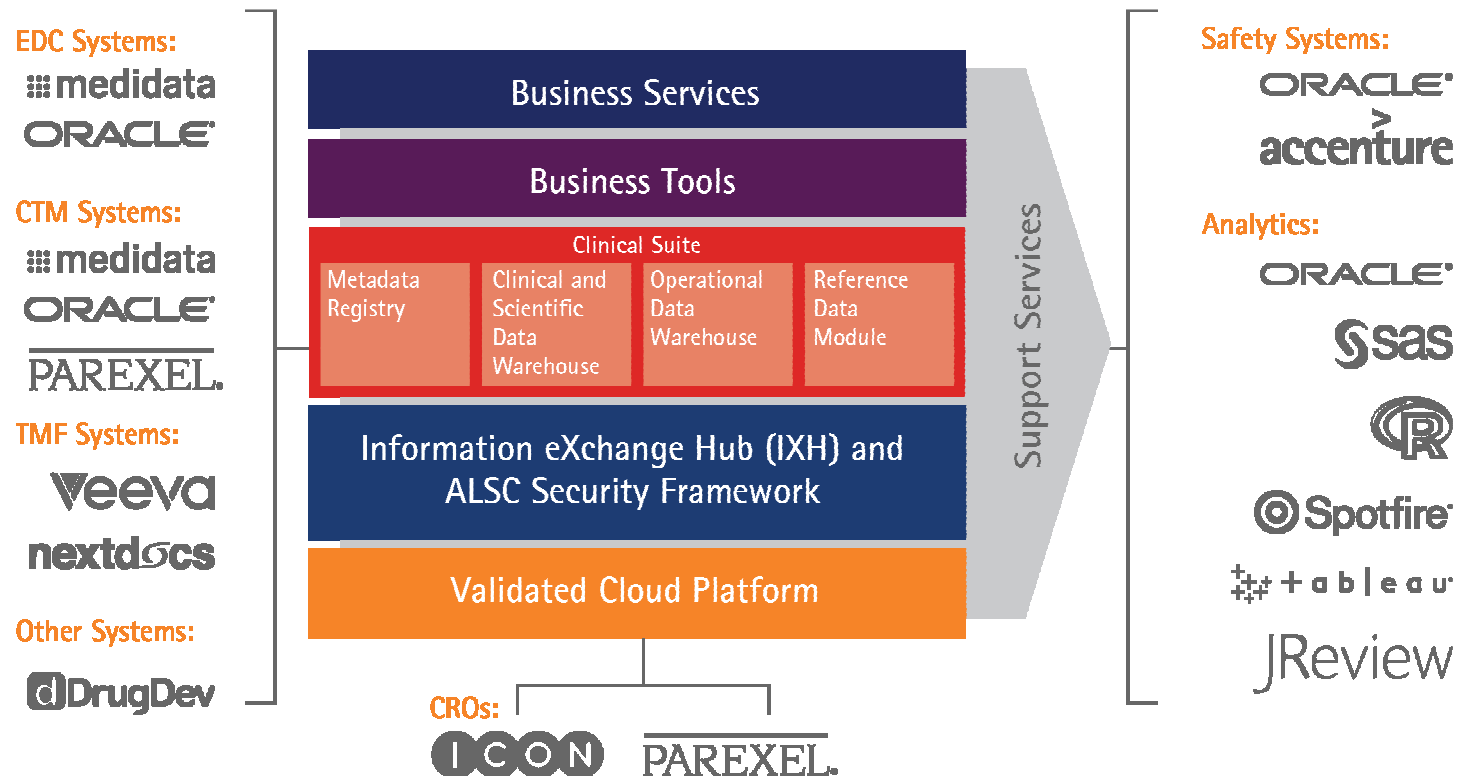

End-to-End Data and Technology-Enabled Process

Outcomes Achieved Through Actionable Insights

- Informed Study Design
- Adaptive Study Decisions
- Precision Medicine
- Risk Based Monitoring
- Operational Reporting
- Data Cleaning
- Quality Review & Discrepancy Management
- Regulatory Analytics
- Benchmarking
- Product Defense
- Risk Benefit Assessment
- Value-vigilance

Integrated with the Industry...

The Life Sciences Cloud Coalition

- The Life Sciences Cloud Coalition is a group of like-minded Pharmaceutical Companies collaborating to define the strategic direction of the ALSC product.
- The roadmap for ALSC is defined through working sessions with the Executive Sponsor group and Focus Groups for each subject and domain area.

Demonstration Use Cases and Scenarios

Finding Data

Enterprise search across structured, unstructured and external clinical data, metadata and documents

Data Pooling

Using the check-out cart to interactively pool datasets

Standards Management

The first step in preparing data – managing standards

Data Loading and Preparation

Loading, checking and conforming data for Data Management

Discrepancy Management

Finding, viewing and managing discrepancies on queried data

Statistical Computing

Using our Analysis and Reporting Workbench to perform statistical analysis on study data
