The Vision of Clinical Data Science

Where will we be in 2025?

A word cloud of clinical data science trends. The words are arranged in a circular pattern, with 'eSource' being the largest and most central. Other prominent words include 'Insourcing', 'Patient Engagement', 'Life Cycle', 'Wearable', 'Adaptive', 'Globalisation', 'Resource', and 'Talent'. Smaller words include 'Collaborative R&D Models', 'Increased Risk Averseness', 'Open Source Tools', 'Patient Monitoring', 'Statistical Computing Environments', 'Off-shoring', 'Real Life Data', 'In-life Trials', 'Health Outcomes', 'Personalised Tx', 'Conditional Approvals', 'Sophisticated Trials', and 'Sourcing'.

Future Forum Kick Off Meeting London; 26th August 2015

Rethink today for tomorrow

Tomorrow's healthcare system will be connected and focused on outcomes and actionable healthcare data, incentivizing prevention and cure

The implication: The opportunities for data science and clinical development will shift from **developing products or services to developing prevention and managing outcomes**

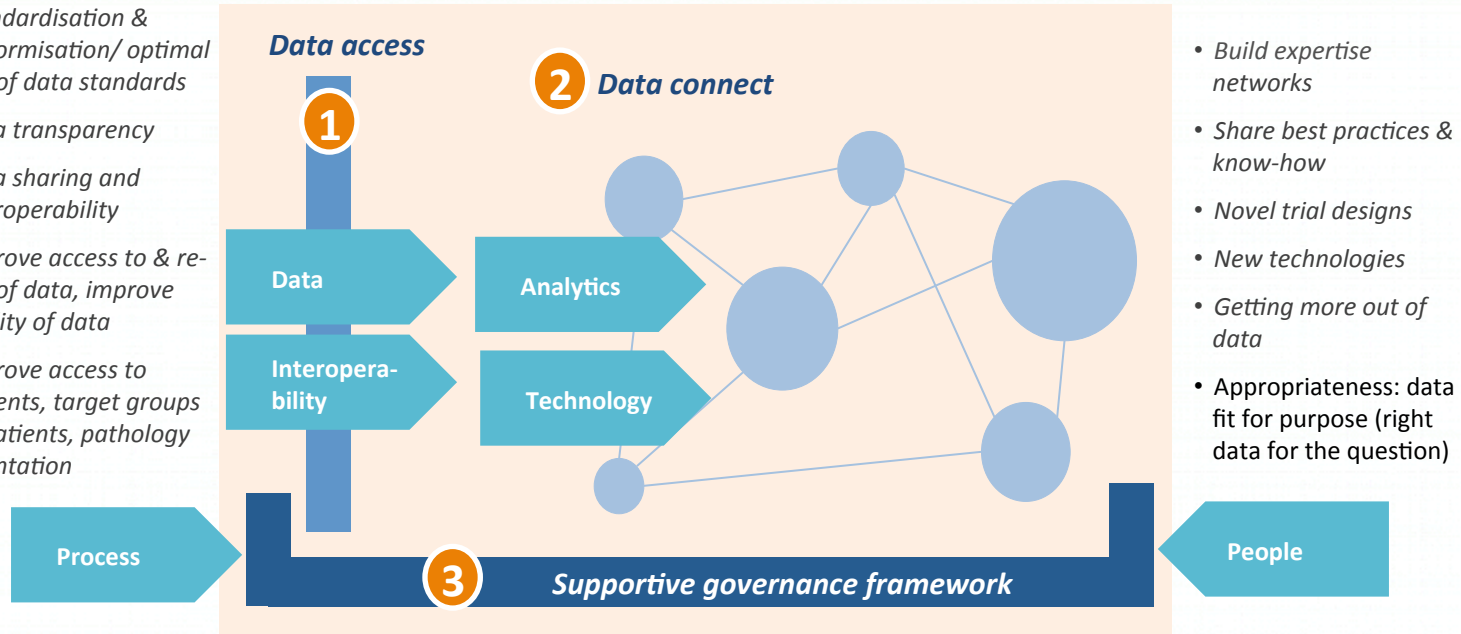

Major healthcare trends define clinical development & data science transformation areas

PhUSE will enable adaptability and flexibility that will bring more value

STRATEGIC INITIATIVES

- *Standardisation & uniformisation/ optimal use of data standards*
- *Data transparency*
- *Data sharing and interoperability*
- *Improve access to & re-use of data, improve quality of data*
- *Improve access to patients, target groups of patients, pathology orientation*

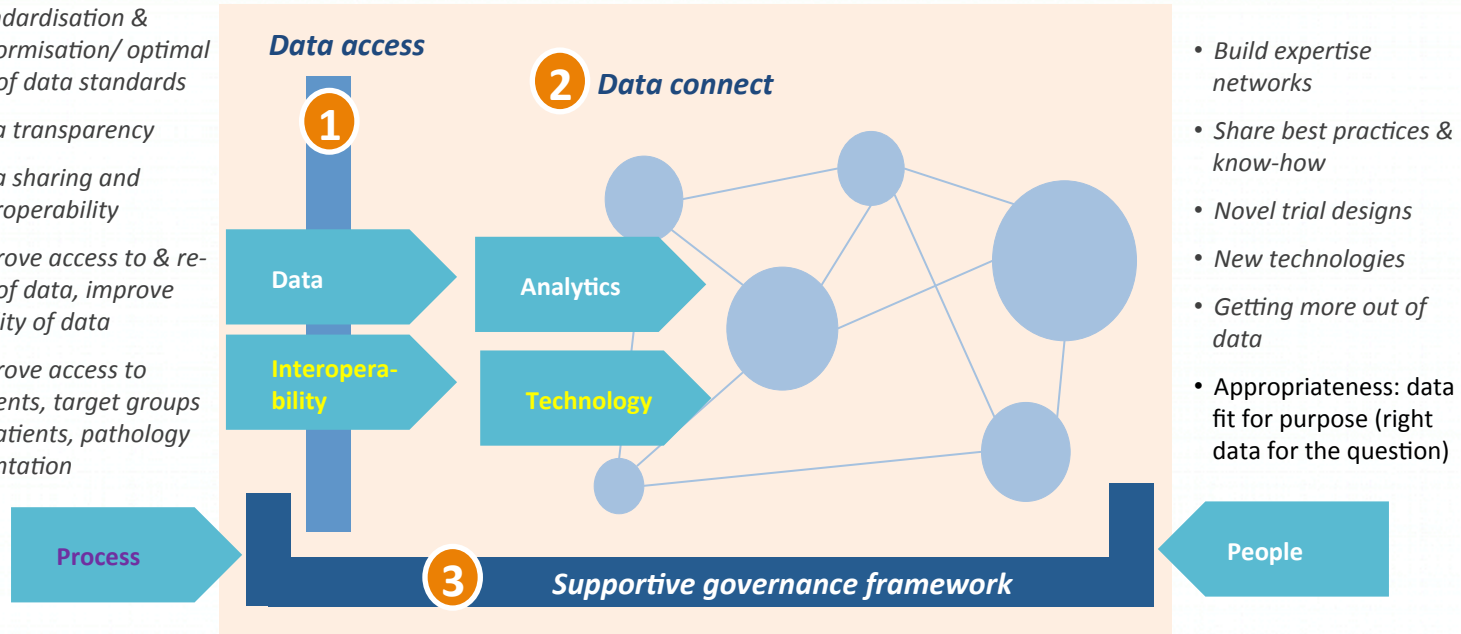

- *Build expertise networks*
- *Share best practices & know-how*
- *Novel trial designs*
- *New technologies*
- *Getting more out of data*
- *Appropriateness: data fit for purpose (right data for the question)*

- *Collaborative business models*
- *Facilitate access to innovative therapeutic solutions*
- *Provide supportive incentives for innovation*
- *Interdisciplinary & multidisciplinary approaches*

The PhUSE CSS is traveling to Europe...

Join us in Basel, Switzerland
21st & 22nd June 2016

Why a European CSS?

- Collaboration and innovation are global
- European colleagues make significant contributions to the CS Collaboration
 - Steering Committee
 - Working Group Co-Leads
 - Project Co-Leads
- > 20% of US CSS attendees from Europe

European CSS Overview

- June 21-22 in Basel, Switzerland
- Focused on a subset of CS projects
- **Free** to PhUSE members
 - Only 120 spots available
 - Registration is open

European CSS Agenda

- Tuesday, June 21
 - 14:00-16:00: Opening Session
 - 16:00-17:00: Working Group Breakout and Introductions
 - 17:00-18:30: Semantics 101 for Pharma Workshop
- Wednesday, June 22
 - 9:00-15:00: Working Group Breakout Sessions
 - 15:00-17:00: Working Group Wrap Up and Closing Remarks

European CSS Projects

SCE Experiences

- Describe and develop requirements for an ideal SCE

Alternative Submission Transport Formats

- Finalise evaluation criteria survey

De-Identification of ADaM

- Continued development of ADaM de-identification rules

Non-Clinical: SEND Implementation

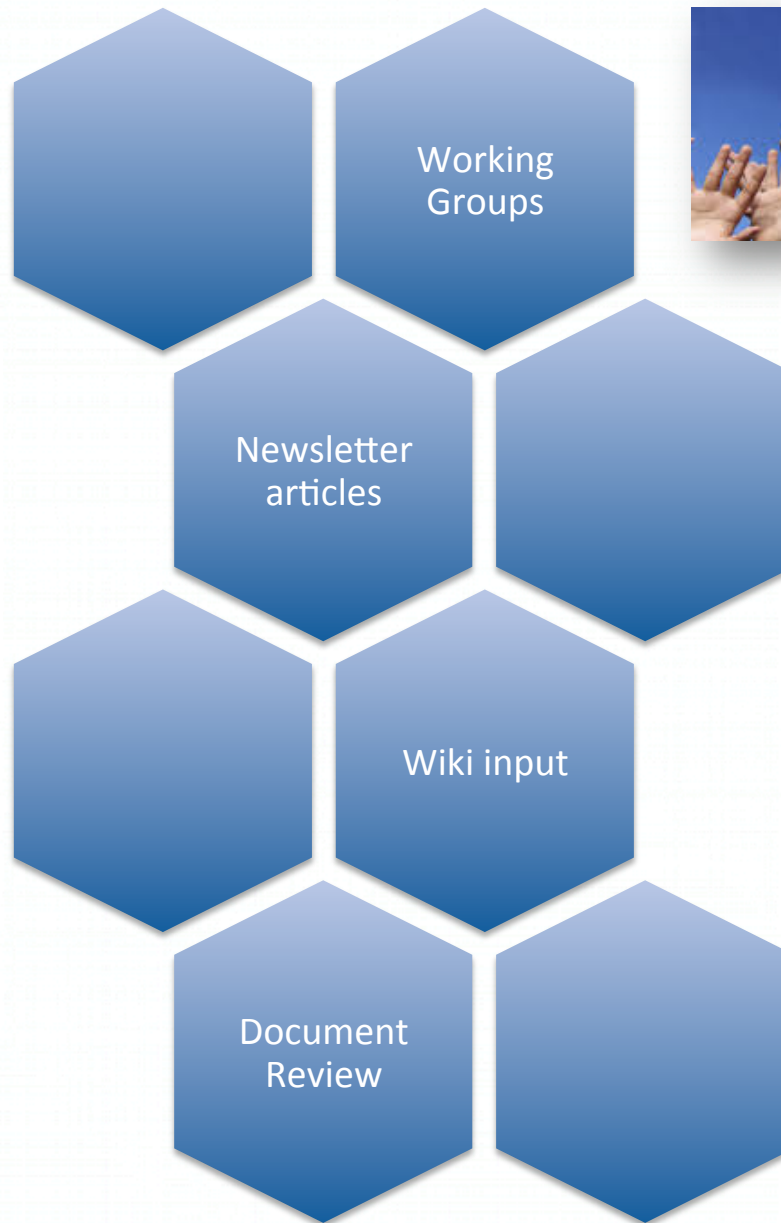

- Review of ongoing Working Group projects

SDTM Implementation FAQ

- Joint CDISC/PhUSE project to address SDTM implementation questions

PhUSE Future Forum: Process Optimization

- Define optimal to enable new ways of working and increase collaboration

WE NEED YOU !

The PhUSE Board welcomes your suggestions

THANK YOU

The premier community for people working in the biometric area
