THE ARBM ECOSYSTEM

Introduction

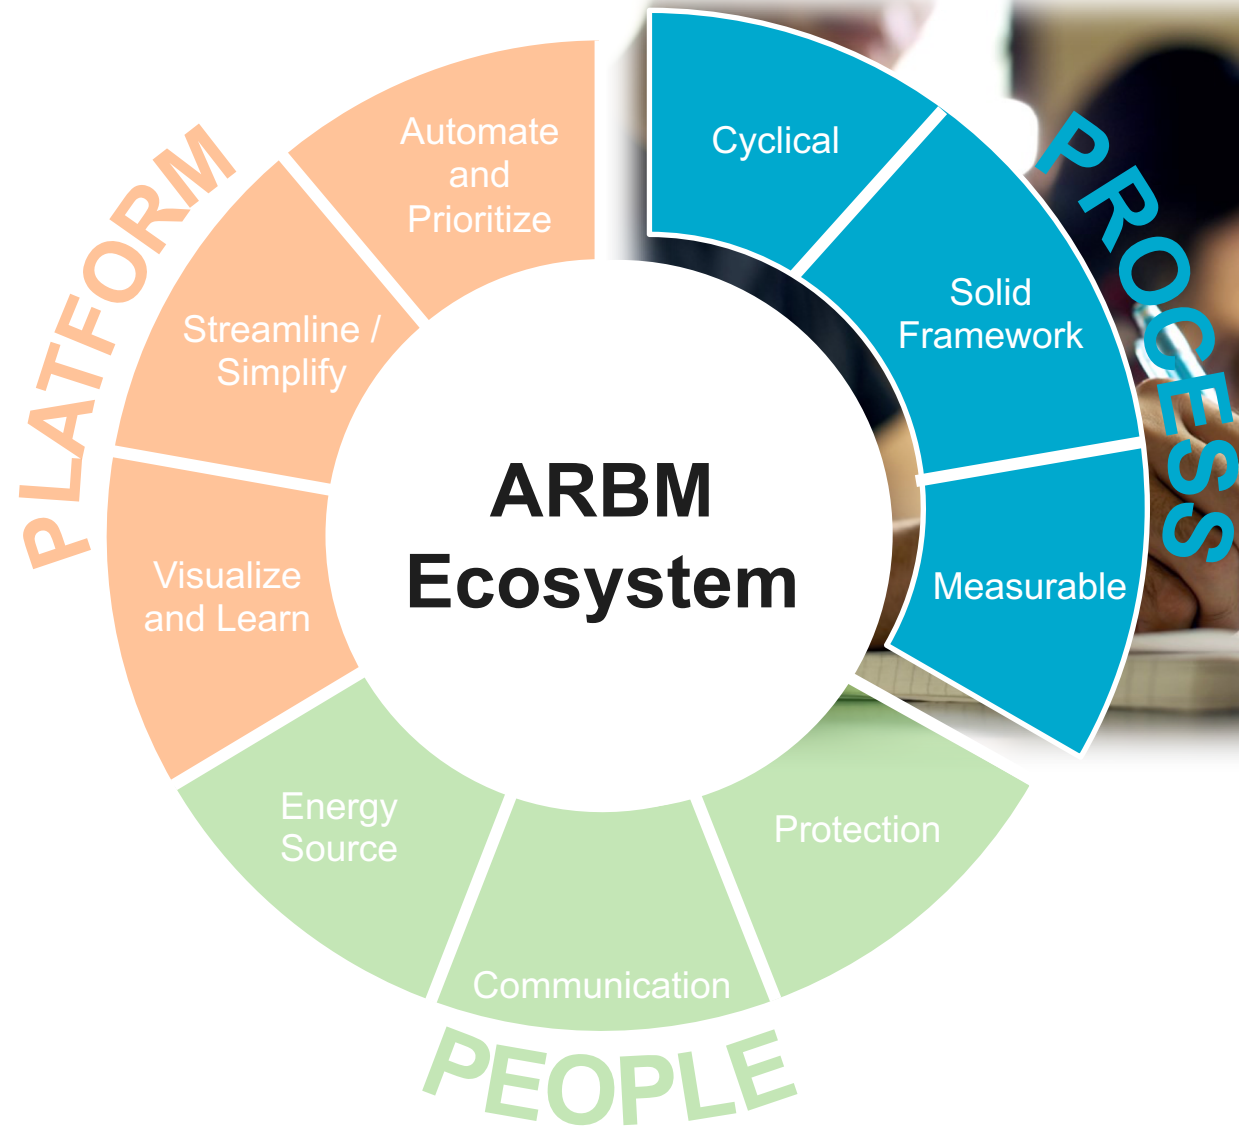

“Too much so-called “risk management” involves simply ticking boxes, going through the motions, attending risk workshops and review meetings, and getting it over with as quickly as possible so we can return to the real job. Whatever this is, it is not managing risk.”

Changing Landscape

Prolific Data

- eSource
- eCOA
- Direct EHR integration
- Wearable technologies

Advanced Analytics

- Automation
- Machine learning
- Predictive analytics
- Virtual trials

Rules of Engagement

- Patient centricity
- Regulations
- Reliable evidence
- Agile management
- Scalability
