

SimpleStats

Statistical Analysis for Clinical R&D Made Simple

NEED OF ML, DL & NLP FOR TLG GENERATION

- To Extract table structure from TLG mockshell
- To Identify appropriate ADaM variable
- To identify required statistical methods for the given table
- To train the system from users while it encounters new input information every time
- To reuse the learning and produce more accurate results

WHY SIMPLESTATS?

- Significant reduction of programming efforts
- Easy adaption to any sponsor's TLG mock shells
- Quick & Flexible to re-do TLGs towards mock shell and ADaM data changes
- Downloadable Stand-alone programs without Macros

USAGE OF AI TECHNOLOGIES

OVERALL PROCESS

Tool Demonstration
