+

Explain what & Understand why

Data Classification

Go beyond the basics

Value Adding Attributes

- Dimension / Measure
- Independent / Dependent Variable
- Related (commonly associated) elements
- Is it a Critical Data Point?
- Situational Variations

Ingest data,
Write edit checks,
Validate the checks,
Write listings,
Validate listings,
Transform the data,
Validate transformations,
Generate TLFs,
Ad hoc requests,
...

Approaching the Problem

Compare to various standard structures?

Taking a Broader View

Focus on Concepts

Matching & Adjudicating

Reap Benefits & Capture Usage

Efficiency Gains

With the usage patterns known, we can drive automation for significant efficiency gains throughout the study life cycle.
