PHUSE Education: Therapeutic Areas & Clinical Documents

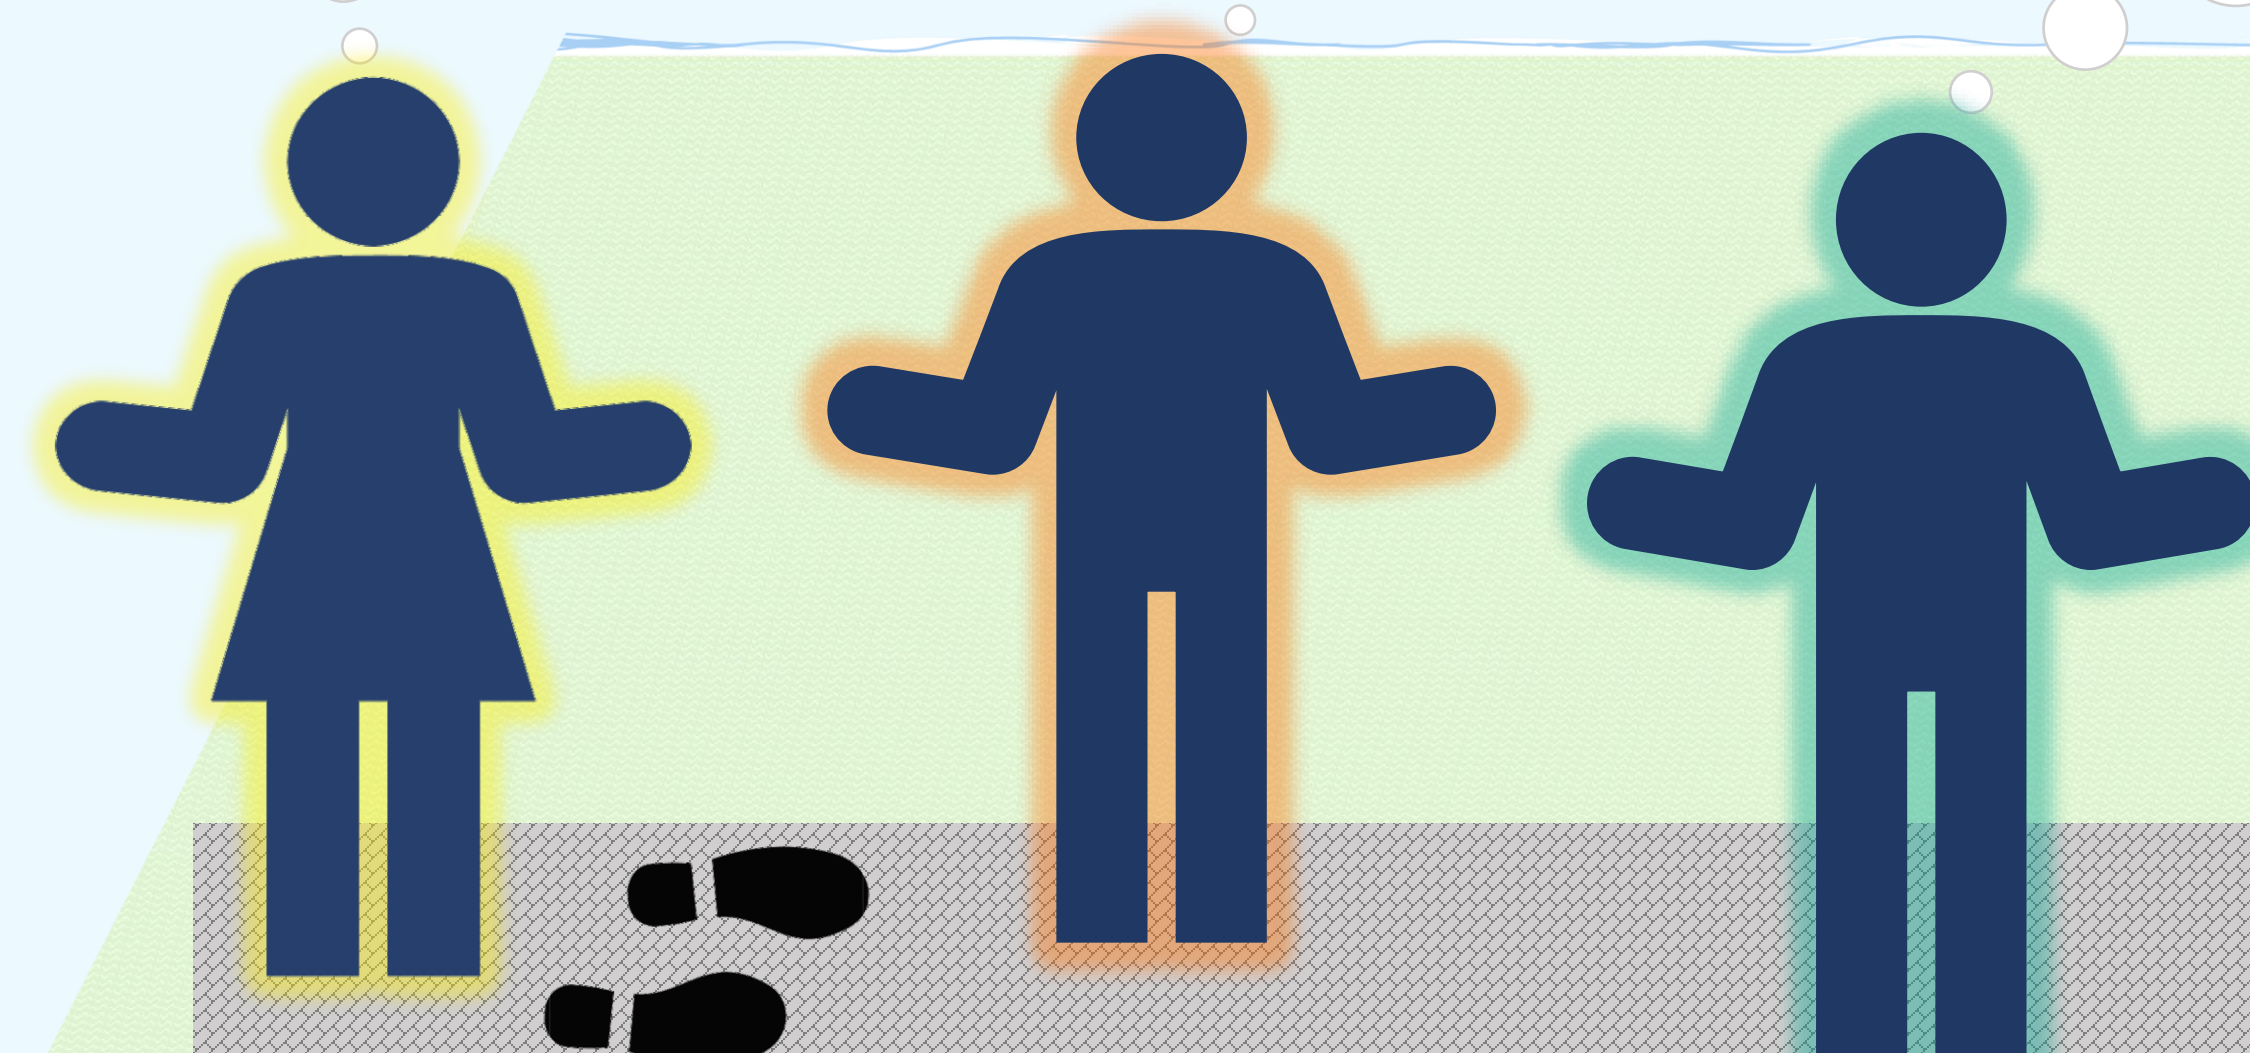

A Programmer's Journey to Enhance Knowledge & Expertise

Amar Mahidadia
Rabia Ahmad

Ask colleagues?
Difficult during pressure-filled delivery timelines.
Easy to get intimidated.

Web search?
Results may not always be focused or accurate.

Company trainings?
Are usually role- & department- specific. Hard to find if tied to SOPs or training systems.

The **Clinical Documents** cluster aims to provide insight into essential documents used during the clinical drug development process.

The **Therapeutic Areas** cluster aims to provide thorough overviews of disease descriptions, study designs, data challenges and underlying guidelines.
