What Stays Put While AI Keeps Changing

Melissa Barca, Principal Software Engineer, Posit
PHUSE Boston 2026

From core banking to open source

Move fast on a foundation that holds

Three products

Posit Workbench

Centrally managed
platform for data
science teams

Positron

Polyglot data science
IDE

Posit Assistant

Platform agnostic data
analysis assistant

POSITRON PRO

Positron in Workbench

Same experience in a new environment

New Session
Create a new session

Positron Pro RStudio Pro JupyterLab VS Code

Secrets

Desktop

In Workbench

Not needed

Workbench handles it

Update anytime

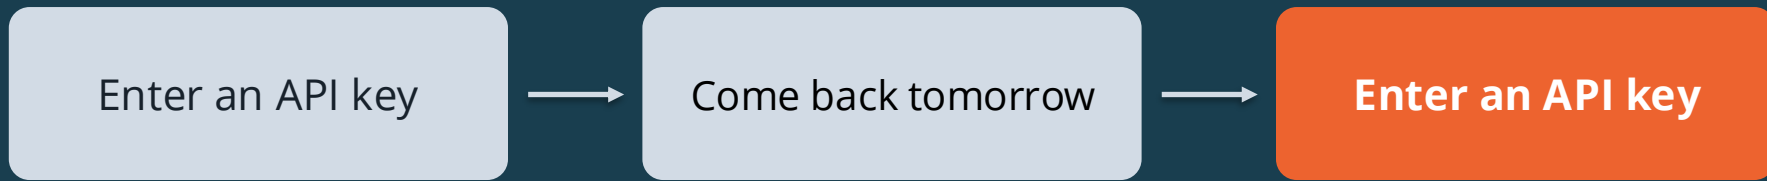

Positron can update separately

OS secure storage

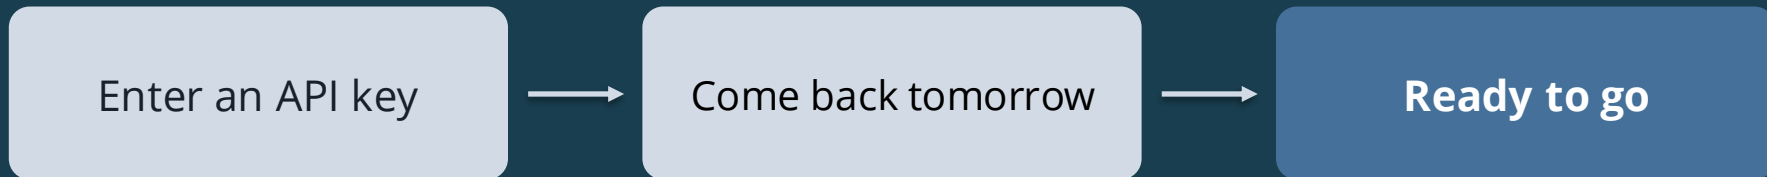

Persist securely

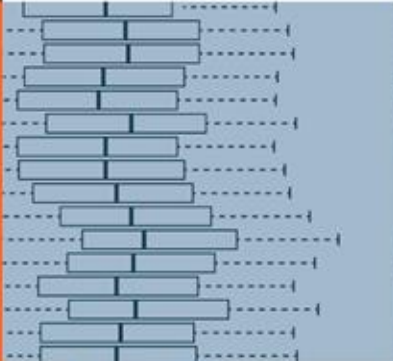

Ordinary expectations

BEFORE

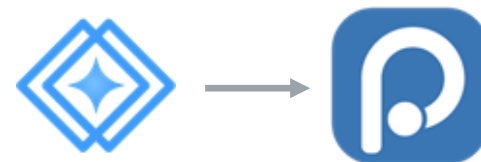

AFTER

Posit Assistant in Positron

The target keeps moving

WHAT KEEPS CHANGING

New providers

Gateways in front of
providers

New authentication
requirements

X

WHERE EACH ONE LANDS

Positron

Posit Assistant in RStudio

Posit Assistant in the terminal

Workbench admin settings

=

**Every change
multiplies**

One assistant, three platforms

Positron

Its own provider setup

Posit Assistant

Its own provider setup,
in RStudio and the
terminal

The result

One new provider,
separate changes for
each product

One provider setup

WHO SETS IT UP

You, in a text editor

Positron

Posit Assistant

Workbench admins

RStudio

providers.json
The shared setup

Shared library
Gives every feature
the same answer

WHO USES IT

Positron AI features

Posit Assistant in
Positron

Posit Assistant in RStudio

Posit Assistant in the
terminal

The next AI feature

The admin experience

Everyone

A group

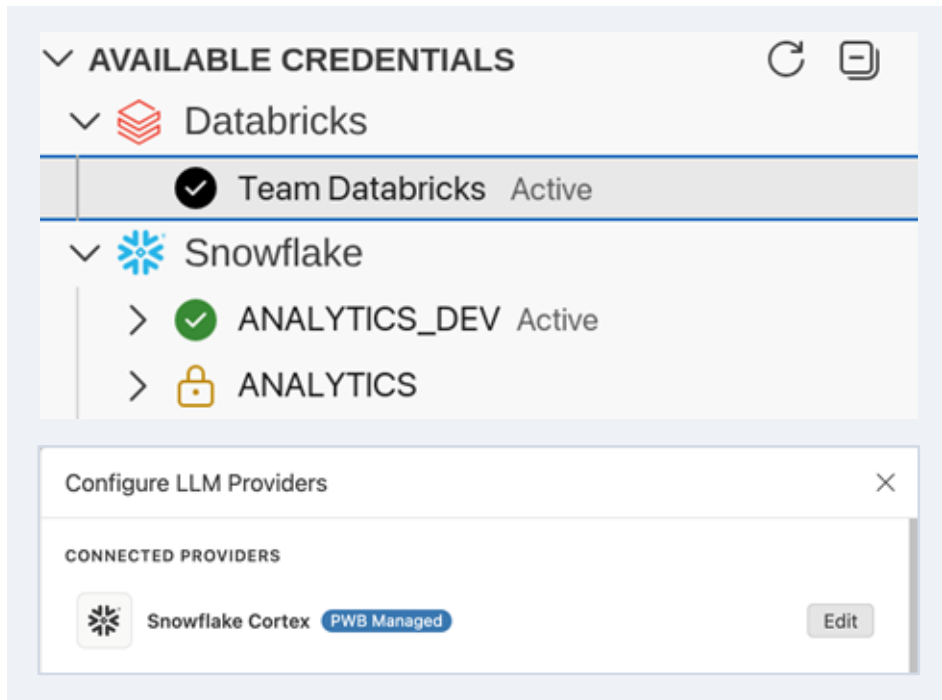

One person

Enforced

Default

```
{
  "providers": {
    "default": { "enabled": false },
    "bedrock": {
      "enabled": true,
      "aws": { "region": "us-east-1" } },
    "anthropic": {
      "enabled": true,
      "baseUrl": "https://ai-gateway.example.com/v1"
    },
    "openai": {
      "enabled": true,
      "models": { "allow": ["gpt-5.6", "gpt-5.6-mini"] }
    }
  }
}
```

Credentials that just work

Admin provides a credential

Workbench & Positron refresh

People keep working

Changing the foundation without creating a migration project

Workbench configuration

Preserved when Positron Pro became generally available

Provider settings

Moved into providers.json automatically

Older versions of Positron

Continue working as Assistant upgrades

What stays put

User expectations

Secrets persist. Existing setup comes with you.

Product boundaries

New providers plug into one shared system

Admin controls

Defaults and enforcement applied everywhere

Ready for what comes next

Thank you
